Material safety data sheet / REACH

Dear Sir or Madam,

The ceramic products manufactured by QSIL Ceramics GmbH are products within the meaning of the REACH regulation 1907/2006. In the case of products, the supplier is only obliged to notify if these products contain substances of concern according to Articles 57 and 59(1) of the REACH Regulation in a concentration of more than 0.1 wt%.

“Each supplier of a product that meets the criteria of the Article 57 and it contains a substance identified in accordance with Article 59 paragraph 1 in a concentration of more than 0.1 wt% shall provide the recipient of the article with the information available to him that is sufficient for safe use of the product, but at least gives the name of the substance in question.”

According to the current state of knowledge, our ceramics do not contain any substances or formulations from the SCHC candidate list of the ECHA.

The preparation of material safety data sheet for products is not prescribed.

Best regards
QSIL Ceramics GmbH
